Weave Multi-Point Trim

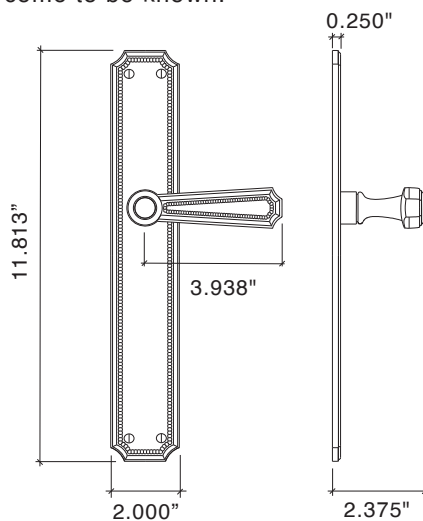

Von Morris Weave Multi-Point lock trim is Custom Made to Order. Your trim will be crafted to the door specifications/details/measurements you provide.

All Von Morris Escutcheon Plates may be modified to fit a multitude of Multi-Point locks in either Euro Profile Cylinder or American Cylinder.

The Von Morris American Cylinder Multi-Point trim is different from other manufacturers. Von Morris has redesigned every aspect of the Multi-Point Trim, including the American Cylinder Mounting Blocks. Instead of one generic block mounted to all styles, each suite gets its own unique suited block. For Profile Cylinder trims, the turn piece mounted to the Profile Cylinder is the same design as the trim.

Von Morris is the only mainline manufacturer to stay true to its suited line, offering the same attention to detail that is available in every Knob, Lever, Rose and Escutcheon Plate. This allows you to complete a full hardware schedule with the same style, detail, quality, and value for which the Von Morris product has come to be known.

- Solid forged brass with Weave Lever and Plate.
- Intricate Weave detail and beading.
- Adaptor for American cylinder block has the same detailing as rest of Weave suite.
- Turn pieces for both American cylinder and European Profile cylinder share the same detailing as rest of Weave suite.

Weave Locking Privacy Cremone Bolt

Features:

Von Morris Weave Cremone Bolts feature a solid brass case CNC milled from brass billet and guides with an internal mechanism of brass and stainless steel. The Locking Cremone case is very narrow, less than 1.5", for use on narrow stiles of French doors and windows. Cremone Bolt locks from the exterior with a rim cylinder and inside with a turnpiece. Cremone case contains a cassette mechanism that can be handed simply by reversing the cassette. The Cremone can also be easily changed from lever operation (90° rotation) to knob operation (180°) simply by relocating the spindle. Shoot Bolts are attached to the Cremone mechanism with machine screws. **Price Includes Weave Turnpiece and Cylinder Collar along with either a pair or Weave Levers or Knobs, and a small Weave Rose for the exterior**

Guides:

End Guides have a flat spring operating on the front of the bolt to prevent rattling. The length of the Guide and placement of the spring conceals any scratches on the bolt caused by the spring. This End Guide design allows the bolts to be installed on the door and then cut to length at the job site.

Locking Cremone Case Size:

Length:	10.5"
Width:	1.5"
Height to edge of case:	0.787"
Height to face of knob/lever boss:	1.024"
Spindle hub to turnpiece spacing:	2.250"
Spindle hub to cylinder spacing:	2.467"

Spindle Height: Standard Spindle height is 42".

Standard Lengths: 7', 8' and 10'. Other sizes by special order.
Bolts can be cut to size at job site.

Hub Rotation: Knob - 180° rotation. Lever - 90° rotation.

Throw: Knob Operation – 1.00" Lever Operation – 0.75"

Spindle: Cremones are supplied with a special spindle for double sided operation

Bolts:
Bottom bolt: 0.625" wide x 40.01"
Top bolt: 0.625" wide x 40.03" for a 7.0' Door
Top bolt: 0.625" wide x 52.92" for a 8.0' Door
Top bolt: 0.625" wide x 76.92" for a 10.0' Door

Strikes: Cremone Bolts are supplied with Mortise and Universal strikes. Angle strikes and Box strikes are available at an additional cost.
